COPYRIGHT: APV SAFETY PRODUCTS P/L.

Important Notes:

1) All belts comply to SAE J386 standard.
2) All belts listed are Black. For Fluro Orange add "FO" e.g. KxxxxFO.
3) Wrap around covers are available only on ELR belts (Refer to page 2).
4) All buckles except webbing variants are available with electric connection
5) Floor mounted applications may require the K4408 Right Angle bracket. (Refer to page 2)
6) Seat-mounted stalk applications may require the K6050 Spacer kit. (Refer to page 2)
7) Some installations may require vehicle and bracket modifications. Please seek the assistance of a suitably qualified mechanic.

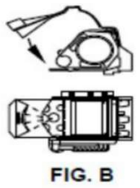
INDUSTRIAL SEATBELT TYPES

ELR - EMERGENCY LOCKING RETRACTOR

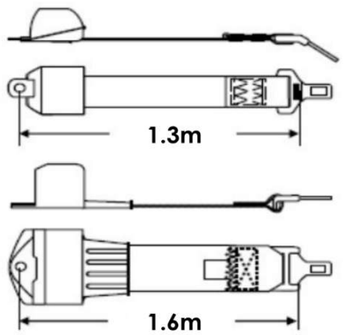
The Emergency Locking Retractor is a dual sensitive type. Sudden vehicle movement and/or rapid webbing withdrawal will cause the retractor to lock. In order to ensure correct functioning of the sensing mechanism, the retractor must be mounted within 2 degrees of its designed mounting angle.



WRAP AROUND COVER

All ELR type Lap belts are automatically supplied with a box type cover by default Fig A. A smaller 'Wrap Around Cover' is also available Fig B. The 'Wrap Around Cover' is suitable for applications where the standard cover may be too bulky.

ALR - AUTOMATIC LOCKING RETRACTOR

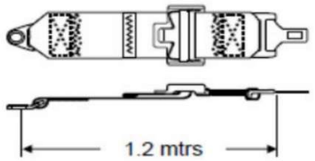


2" ALR

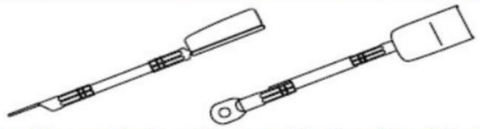
3"ALR

The Automatic Locking Retractor retracts the webbing to the body after the tongue and buckle are engaged. This type of seat belt automatically locks when the mechanism is activated after a certain amount of webbing is withdrawn from the spool.

3" STATIC LAP

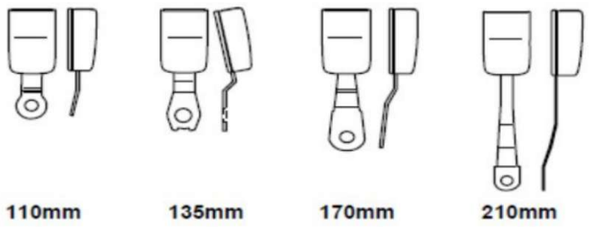


TUNNEL / SEAT MOUNTED STALK BUCKLES

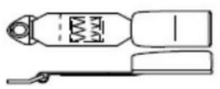


All Stalk buckles are designed to mount to the side of the tunnel but can mount to the side of the seat. Please use K6050. For applications where the buckle is mounted to the floor, please use K4408.

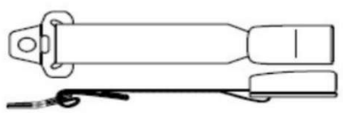
SEAT MOUNTED STEM BUCKLES



WEBBING BUCKLES

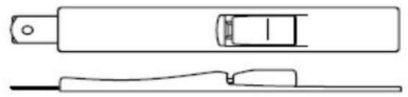


FIXED



ADJUSTABLE

SPRINGBELT



The ***SPRINGBELT*** is designed to sit up-right when not in use, creating a hindrance to the driver and forces the ***SPRINGBELT*** to be used. Size and colour of the ***SPRINGBELT*** also assist in visual enforcement / supervision.

ELECTRIC BUCKLES

All Stalk, Stem & Springbelt buckles are available with an electric switch. Add 'E' after the K of the required kit. Eg
K4654 = Standard. KE4654 = Electric

BLUE WIRE NORMALLY CLOSED
BLACK WIRE NORMALLY OPEN
RED WIRE COMMON
POWER: 12V (2A), 24V (1A)

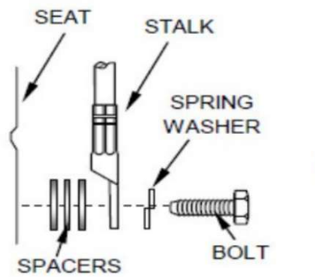
ACCESSORIES

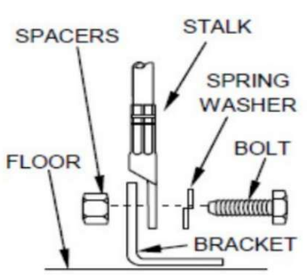
K6050

This kit consists of:
3 x Flat washers

K4408

This kit consists of:
1 x 7/16 unf bolt
1 x Spring Washer
1 x Right Angle Bracket
2 x 7/16 unf nut





EASI-GRIP RESTRAINT SYSTEM
